Manufacture

Mix A and stir until completely dispersed. Heat up A to 75°C-80°C. Mix B, heat up to 75°C-80°C too. Add A to B while stirring and homogenize for 3 minutes at 16000 rpm by Ultra Turrax. Cool down under stirring. Add the ingredients of C in the given order below 40°C and stir until homogenous.

The recommendations and formulations given are based on our knowledge and experience in the field of technical application. They are, to the best of our belief, correct, but are offered without obligation. Those who use our recommendations and formulations as well as those who process CLR Active Agents are themselves responsible for the adherence to prevailing statutory regulations and the observance of patent rights as well as other protective rights for other companies.

*) This formula has been manufactured and stability tested using a special preservative, but has not been subjected to microbiological challenge tests.
