C	Vitamin F forte	Linoleic Acid, Linolenic Acid	1.00	CLR
	PhytoDefense CLR™	Glycine Soja (Soybean) Oil, Dicaprylyl Ether, Magnolia Grandiflora Bark Extract, Lauryl Alcohol	3.00	CLR

Manufacture

Melt phase A by heating to 85°C. Add phase B and stir until uniform. Cool down to 40°C and add the ingredients of phase C. Pour into an appropriate container and cool down to RT.

The recommendations and formulations given are based on our knowledge and experience in the field of technical application. They are, to the best of our belief, correct, but are offered without obligation. Those who use our recommendations and formulations as well as those who process CLR Active Agents are themselves responsible for the adherence to prevailing statutory regulations and the observance of patent rights as well as other protective rights for other companies.
