Operating instructions

<i>Operating Instructions</i>
<p>Mix A and predisperse phase B until completely soaked. Heat up A and B to 85°C separately. Add B to A and homogenize for 3 minutes with Ultra Turrax. Cool down while stirring and add C-D in the given order below 30°C, one after another. Stir until homogenous and adjust pH value to >5,3-6. Add F with moderate stirring (anchor stirrer is recommend).</p> <p>Directions for use: Apply as a last step in your skincare regimen. Take a pea sized amount and gently massage into the skin.</p>
