Operating Instructions
Heat up A to 80°C while stirring (magnetic stirrer) until melted. Cool down to 65°C under stirring and add B. Stir until uniform and fill into appropriate container. Directions for use: Scoop the appropriate amount. Gently massage into circular motion onto dry skin using your fingertips to remove make-up and residue. Add water and massage further to emulsify the oil. Rinse well with lukewarm water.

The recommendations and formulations given are based on our knowledge and experience in the field of technical application.
They are, to the best of our belief, correct, but are offered without obligation.
Those who use our recommendations and formulations as well as those who process CLR Active Agents are themselves responsible for the adherence to prevailing statutory regulations and the observance of patent rights as well as other protective rights for other companies.
This formula has been manufactured and stability-tested using a special preservative, but has not been subjected to microbiological challenge tests.
