

CLR Formulation Concepts

UnderEye Concealer Stick – Nude

This **UnderEye Concealer Stick** creates a combination of resistant and weightless coverage. The formula melts into the skin and leaves the complexion with a naturally perfect look. With just a swipe it covers beautifully and stays in place.

ProRenew Complex CLR™ safeguards the skin's ecosystem and improves overall skin quality and health. **MultiMoist CLR™** compensates for a lack of vitamin D, promotes epidermal differentiation and provides the skin with a healthy level of hydration and smoothness. **JuvenEye CLR™** clearly reduces the visibility of dark circles and activates dermal draining for less puffy eyes.

Directions for use:

Step 1. Dot concealer on your dark circles under the eyes.

Step 2. Pat with a finger or tool to blend.

Featured Products

ProRenew Complex CLR™ – Postbiotic support for skin and its microbiota

ProRenew Complex CLR™ acts on essential features in the aging process of the skin, its ability to successfully adapt to a constantly changing environment and to effectively renew itself.

ProRenew Complex CLR™ positively influences the speed and quality of epidermal growth. It has shown to effectively promote desquamation, the shedding of dead cells. ProRenew Complex CLR™ is beneficial for both the health of skin and the skin microbiota. It balances and protects the skin microbiota and supports it in dealing with day-to-day stress.

Dosage: 3.0%
pH range: 4.0–7.0

INCI Name:
Lactococcus Ferment Lysate

ProRenew Complex CLR™ is preserved with sodium benzoate.

Also available as
ProRenew Complex CLR™ NP, stabilized with phenylpropanol and levulinic acid/sodium levulinate.

JuvenEye CLR™ – against dark circles, for youthful bright eyes

Based on a synergistic combination of extracts of *Hieracium pilosella* and the flowers of *Bellis perennis*, JuvenEye CLR™ addresses the most important dermatological processes in the formation and the persistence of dark circles. It activates vital processes which allow for the breakdown of heme, which is both dark-colored and plays an important role in the etiology of dark circles. JuvenEye CLR™ also activates dermal draining through its ability to increase the production of VEGF-C. Excess fluids, electrolytes and immune cells are drained away more effectively. With JuvenEye CLR™, melanin deposition in the skin is reduced and overall skin health is improved.

In *in vivo* studies where JuvenEye CLR™ was compared with a corresponding placebo formulation it could be seen that JuvenEye CLR™ clearly reduces the visibility of dark circles. Both the color and the surface area of dark circles were reduced significantly.

Dosage: 3.0–5.0%
pH range: 4.5–6.5

INCI Name:
Bellis Perennis (Daisy) Flower Extract, Hieracium Pilosella (Hawkweed) Extract

JuvenEye CLR™ is preserved with sodium benzoate and sodium dehydroacetate.
