E	Cameleon CelluBrown	Iron Oxides Titanium Dioxide Cellulose Acetate Magnesium Stearate Propylene Glycol Stearate Ethyl Cellulose	Tagra	1.00
				100.00

Operating Instructions

Mix A and B separately. Heat up both to 80°C. Add B to A and homogenize for 5 minutes. Cool down while stirring and add C below 35°C. Adjust pH value to 7-7.5 with D. Add E with moderate stirring.

Directions for use:

Apply evenly and liberally to face, preferably 15 minutes prior to sun exposure.

The recommendations and formulations given are based on our knowledge and experience in the field of technical application.

They are, to the best of our belief, correct, but are offered without obligation.

Those who use our recommendations and formulations as well as those who process CLR Active Agents are themselves responsible for the adherence to prevailing statutory regulations and the observance of patent rights as well as other protective rights for other companies.

This formula has been manufactured and stability-tested using a special preservative, but has not been subjected to microbiological challenge tests.
