| B | Cetiol LC | Coco-Caprylate/Caprates | BASF | 4.00 |
| C | ProRenew Complex CLR™ | Lactococcus Ferment Lysate | CLR | 3.00 |
| C | Lactic Acid (80%) | Lactic Acid Water | N.A. | 0.11 |
| | | | | 100.00 |

Operating Instructions

Mix A and predisperse until homogeneous. Heat up A and B to 80°C separately. Add A to B and homogenize for 3 minutes by Ultra Turrax. Cool down while stirring, add C below 30°C and adjust pH value to 6-6.5.

Directions for use:

Apply on cleansed skin and massage gently.

The recommendations and formulations given are based on our knowledge and experience in the field of technical application.

They are, to the best of our belief, correct, but are offered without obligation.

Those who use our recommendations and formulations as well as those who process CLR Active Agents are themselves responsible for the adherence to prevailing statutory regulations and the observance of patent rights as well as other protective rights for other companies.

This formula has been manufactured and stability-tested using a special preservative, but has not been subjected to microbiological challenge tests.
