D	NaOH (10%)	Water Sodium Hydroxide	N.A.	0.05
				<b>100.00</b>

#### **Operating Instructions**

Heat up A/B to 80-85°C separately. Add B to A while stirring. Homogenize for 3 minutes and stir cold slowly. Add C in this order below 30°C and stir until uniform. Adjust pH value to 6 with D, if necessary.

Directions for use:

Take a pea-sized drop of the cream and gently massage into the skin before going to bed.

The recommendations and formulations given are based on our knowledge and experience in the field of technical application.

They are, to the best of our belief, correct, but are offered without obligation.

Those who use our recommendations and formulations as well as those who process CLR Active Agents are themselves responsible for the adherence to prevailing statutory regulations and the observance of patent rights as well as other protective rights for other companies.

This formula has been manufactured and stability-tested using a special preservative, but has not been subjected to microbiological challenge tests.
