## **Operating Instructions**

Dissolve A and stir well. Slowly add B in the given order and mix until uniform. Adjust pH value to 6-6.5 with C. Add D and stir until homogeneous. Add E as desired.

Directions for use:

Apply the treatment to the scalp and massage gently.

The recommendations and formulations given are based on our knowledge and experience in the field of technical application.

Those who use our recommendations and formulations as well as those who process CLR Active Agents are themselves responsible for the adherence to prevailing statutory regulations and the observance of patent rights as well as other protective rights for other companies.

This formula has been manufactured and stability-tested using a special preservative, but has not been subjected to microbiological challenge tests.
