**Operating Instructions**

Mix A and stir until uniform. Add B in this order and stir. Adjust pH value to 3.2-3.5 with C.

Direction for use:

Apply a generous amount to the face and neck once a week in the evening after cleansing. A slight tingling sensation is normal. Leave on for 1–3 minutes and rinse off with cold water. Depending on your skin condition, the peel can be used more or less frequently during the week. Follow with a moisturizer and use sun protection in the morning to protect the skin.

The recommendations and formulations given are based on our knowledge and experience in the field of technical application.

They are, to the best of our belief, correct, but are offered without obligation.

Those who use our recommendations and formulations as well as those who process CLR Active Agents are themselves responsible for the adherence to prevailing statutory regulations and the observance of patent rights as well as other protective rights for other companies.

This formula has been manufactured and stability-tested using a special preservative, but has not been subjected to microbiological challenge tests.
