				100.00

Operating Instructions

Heat up A to 80°C and keep temperature for 10 minutes while stirring. Homogenize for 2 minutes, add B and homogenize for a short moment again. Fill into appropriate container. Cool down to room temperature.

Directions for use:

Apply on the face, lips and neck for instant hydration anytime your skin needs that.

The recommendations and formulations given are based on our knowledge and experience in the field of technical application.

They are, to the best of our belief, correct, but are offered without obligation.

Those who use our recommendations and formulations as well as those who process CLR Active Agents are themselves responsible for the adherence to prevailing statutory regulations and the observance of patent rights as well as other protective rights for other companies.

This formula has been manufactured and stability-tested using a special preservative, but has not been subjected to microbiological challenge tests.
