#### **Operating Instructions**

Melt A under stirring (~78°C). Cool down to 70°C, add B and homogenize until uniform. Fill into appropriate container.

Directions for use:

Apply a thick layer to the areas to be protected and blend thoroughly, preferably 15 minutes prior to sun exposures.

The recommendations and formulations given are based on our knowledge and experience in the field of technical application.

They are, to the best of our belief, correct, but are offered without obligation.

Those who use our recommendations and formulations as well as those who process CLR Active Agents are themselves responsible for the adherence to prevailing statutory regulations and the observance of patent rights as well as other protective rights for other companies.

This formula has been manufactured and stability-tested using a special preservative, but has not been subjected to microbiological challenge tests.
